

# **A CLEAN SWEEP FOR** CARBON-FREE CAMDEN Its blogas-powered ovens provide neating the adjacent greenhouses of the King's Cross vegetable growers. And now its new heat-exchanger offers a boost to the King's Cross

by ANNA WOODESON

THIS week Camden celebrates becoming the most energy-efficient borough in London with the retrofit of its last building. This massive, 10-year initiative, born out of the Covid recession, has brought all Camden properties close to achieving a zero-carbon rating.

More than a million buildings, including some 5,000 architecturally listed properties, have been improved by insulation, triple-glazing, ventilation and solar panels. Over 1,000 new jobs have been created and a retrofit army has been mobilised.

Emma Woodhouse, who oversaw the council operation, explains how the enormous challenge was met: "The start was tough, convincing people to overhaul their homes, but we had a real boost during the 2025 gas shortages. When the Camden start-up NotJustHotAir began Turn to page 2

# Last car's last day Droner Kebab

CAMDEN'S last privately-owned car has been towed away from a now redundant parking space near the Pineapple pub in Kentish Town, write Jon Crowcroft. The job, begun in 2021 by the Camden Street Gardeners, is finally done. The crowdfunded project started when the demand for private vehicles plunged and the appeal of self-driven electric vehicles soared. These cars are all parked underground, freeing up the space on the roads once commanded by dirty motors. Middle lanes still allow for occasional deliveries, but the rest

of the old tarmac area has been turned into strip parks, with paths for walkers and cyclists and safe play areas for children. Reclaiming the streets has created a jobs market for gardeners and people who maintain electric cars and bikes. Once it was realised that electric vehicles didn't need big bonnets and boots, people started to **3D-print customised bodies** for them. This in turn has become a fresh form of street art draws a new generation of tourists to Camden Lock. So goodbye, and good riddance, to fossil-fuel dinosaurs!

AN SPL delivery drone collided with a smaller UAV transporting a take-away meal, leaving a mess in Camden High Street, CNJ arrived quickly on the scene to find a heap of mangled metal and plastic, on top of what looked like a

giant prawn korma. A witness said: "There was a crack and a whine, then a splat, and I was covered with oat-milk and gravy. The least they can do is nav for cleaning Bill Williams, head of Camden Futures, said: "It is a setback for autonomous drones, but accidents happen.'

Picture by: Lorraine Walker-Smit

# **Hot-Cross Boon**

'SHOW-me-the-Dough' bakery and biscuit factory is proving an invaluable neighbour. Its biogas-powered ovens provide heating for the adjacent greenhouses of the King's Cross exchanger offers a boost to the King's Cross Pool. Like many public swimming pools, this had to close in the post-Covid recession, but free heating could help it reopen.

# Toddlers bring joy to dementia care

A HAPPY time was had by all at the new dementia care and toddlers play group, set up at Swiss Cottage library by psychologists from the Tavistock Well-Being Centre. The playgroups, located across the borough, are aimed at bringing back memories for those suffering from dementia by stimulating a recall of happier times. Eighty-four-year-old ex-taxi driver Bill, who has advanced dementia, was seen laughing with four-year-old Damien as they played with model cars.

# Veggin' out

WHEN pioneering social enterprise Vegbox celebrated its18th birthday this week, the crew pushed the boat out at its Regent's Cana HQ with homemade cider produced from apples harvested from local street trees. Vegbox chair Ann Wong said of the co-operative's growth: "When we started, we felt we were swimming against the tide. But these days everyone is eating food grown within the M25 hyperloop, and pesticides are a distant memory.

"Ten per cent of our produce is grown in the borough of Camden. As well as our own greenhouses, almost every housing estate now has a thriving kitchen garden or vertical farm, so we buy some of their surplus. "Last year we converted the old Santander offices in Euston to a huge glasshouse for salad leaves. Now we're buying the Shard. We're bringing in 40,000 lettuce plants next month. It's going to be the world's tallest greenhouse

# Women lead the charge for 'caring Camden'

#### by CROSSROADS WOMEN'S CENTRE

THE buzzer goes and a Crossroads Women's Centre regular comes in on her solar scooter, grinning: "I love these things! With green Camden, the streets are ours." Ramblers, cyclists, wheelchair users, babies in buggies, skaters... and buses – frequent. accessible. free.

The Centre is celebrating New Year 2030. Since climate emergency measures kicked in, women and girls have been at the forefront:

occupying the Council offices, camping in Whitehall, rejecting broken promises and delays.

We have little ones to worry about, and ageing parents. We lost so many during Covid-19, especially among communities of colour, that we refused to go back to poverty, racism, pollution. homelessness and cramped housing. We rebelled against deportations and social cleansing, and reclaimed empty buildings. Schools have been transformed. After Black Lives Matter, Youth Strike for Climate and the Care Income Now! campaign, exclusions

were banned, and youth clubs and mothers? support groups reopened

Picture by: Noemie

Care charges have been abolished, and an income paid to mothers

and those who care for people, and the urban and rural environment The effect was magical

No more Department for Work and Pensions starving us into

erohours contracts or kids taken into 'care' if we asked for help, or the solation of coping on our own or being parked in end-of-life institutions

Dads, too, now spend more time with their kids. And young people have stopped killing each other – there are things to

do and places to go. Since stop and search was abolished - and rape, domestic violence and hate crimes prioritised -

the police have become more respectful and are more respected. Sex workers and asylum seekers can report violence without fear.

The work of caring for our communal spaces has only just begun, but allotments are multiplying and organic produce is everywhere.

Food banks have closed and there's no need to beg, do 'survival sex', sleep rough or hide from immigration officers

Camden won the Caring Borough of the Year Award! www.crossroads womens.net

referred by her doctor after experiencing nill She said: "I was warv at first but the support of my GP and the specialist service has made all the difference. This isn't iust feeding information into an app and hoping the algorithm doesn't make a mistake. It's about really understanding what my body is telling me.'

Her partner, Frank also 24, added: "I used to feel worried and guilty about the impact

Study in progress

THE unveiling of the latest National Curriculum reveals how much has changed in the last 10 years. It acknowledges that contact with nature is good for mental health, with students encouraged to have inventive interaction with nature, including greenhouses, growing beds, soil science and outdoor theatre.

Most schools can now opt for a

#### holistic approach to learning, where progressive humanism has replaced the study of tyrants and conquest, and we acknowledge the mistakes of the past.

And the arts are back! Mastery of technology allows time for greater self-expression. Teachers are increasingly freed from targets and assessments, so can enjoy bringing out the best in their charges.

I have a vision A vision where you and me are treated equally Do you have avision A vision to dare A vision to speak A vision to dream where we all live in harmony with buildings and plants A vision that green energy is not green energy Just energy Energy that we all use To power our homes We all have visions But my vision if different My vision is where no cars are to be seen Where Creed does not matter Because we are all humans That homelesness is not a thing Where we all live in harmony Together And my vision may seen crazy But it's just a touch away

"I never thought it would work. Medical school taught us to dismiss fertility

# for 'green' family planning

# Sponsored Feature 'We're all co-ops now'

### by HOUSING REPORTER

TENANTS this week held estate narties across the borough to celebrate the completion of an eight-year programme to hand over all of Camden's council housing to residentled co-operatives.

The transfer process followed widespread concern about the council's housing management, including poor quality renovations (such as the notorious Chalcots estate), lack of consultation about redevelopment plans and use of maintenance contractors from far afield instead of local firms.

The process was rolled out one estate at a time and involved finance and management training for TRA's, a council-wide Co-operative Housing Board and a mechanism for including people who had previously bought their council homes.

"Co-operative management has enabled us to make Camden a genuinely affordable place for families to live, with fuel costs reduced by insulating all homes and introducing renewable community energy programmes," said Tabisha Robinson, one of the coordinators of Homes 4 Us (the umbrella body for Camden's housing co-ops). "And overall maintenance costs

have fallen because residents are invested in working together on this.'

Homes 4 Us have also introduced community gardens and food-growing on most estates, and replaced the Council's strategy of large-scale demolition with tenant-led estate redevelopment schemes based on extending and adapting existing buildings to enlarge the social housing stock.

The tenant-led scheme at West Kentish

Town Estate made use of materials already on site to insulate and reclad the existing blocks. Homes are now heated by electric air-source heat pumps and have been extended with an extra storey of prefabricated units, or combined. to create many more family-sized homes. Every flat now has

access to a balcony or garden. New infill buildings create protected courtyards, with space for play, relaxation and socialising. The ground floor of these uildings provides

workspace for local businesses and activity space for the community, with more new homes above. Existing green space and planting has been enhanced to provide biodiverse habitats with hedgerows, allotments, green walls and roofs, all. providing a green haven in West Kentish Town. \*Find out how to set up a housing co-op at

# What we learnt in the **Twenty-Twenties**

We learnt to be humble. We abandoned our cars. We dimmed all the lights and we looked for the stars.

We planted a forest our streets became farms and by dint of these efforts we learnt to be calm.

We grew vertical meadows green pathways to run and we managed to harvest the wind and the sun.

Then surely but slowly in spite of the din there was more in the compost than there was in the bin.

We learnt to be thrifty and buy things that last and now we've made plastic a thing of the past.

We learnt how to knit and we learnt how to mend. and our throwaway culture just slid to an end.

We learnt our survival meant meaningful change now we all get our clothes from the fashion exchange.

We get our spare parts from our library of things and deep in our forest wild birds flap their wings.

#### Painting by: J.Huntesmith

CAMDEN in Bloom this week celebrated beating strong competition to scoop the coveted First Prize in 'The Great British Rake Off 2030'. Judges were particularly impressed by the borough's many stunning wildflower meadows.

The leader of Camden Council, said: "Back in 2021, when I was Cabinet Member for a Sustainable Camden, I took the decision to phase out the use of glyphosate and other herbicides and pesticides. With the assistance of 'Pesticide Free Cities'. we successfully switched to non-toxic mechanical weed control, at the same time investing in an intensive programme of rewilding Camden. # People's budget funds young talent

#### by DEE SEARLE

CAMDEN'S 2030 Citizens Assembly has earmarked youth start-up businesses to receive the bulk of next year's People's Budget.

Other recipients include high-tech community food growing for people with disabilities, car-free-Friday and a pilot project to wash and reuse glassware rather than sending it to energy-guzzling recycling or landfill.

The funding, worth 5% of the council's annual budget, comes from Camden's 'participatory budgeting' process in which local groups submit proposals to the Citizens Assembly for decisions

The Citizens Assembly was first held in 2019 to guide the council's response to climate and ecological emergency and has since developed into a permaner feature of Camden's democracy, with membership renewed each year by random selection from the borough's residents Participatory budgeting is used by

thousands of cities around the world - from Bangalore to Barcelona - to give

### YOUR VIEW: The COVID trees

I FEEL so hopeful as I walk around Camden past the many Covid Trees, which were planted between 2021 and 2025. Each one marks the passing of someone who had made their life in Camden. All kinds of plots in surprising places were found, prepared and planted. Says Harvey Flinder, who

launched the project: 'We knew it would be better to plant in groups because. just like us, most trees prosper in communities. They nurture and suppor one another. Lonely trees separated from each other fair no better than lonely people And we're still planting trees! For

your free bare-root trees Camdenforest2025 wordpress com

### Kentish Town's sustainable cooking school

IT'S good to cycle and turn into Kentish Town Road without tasting fumes, tyre fragments and dirt that all those vehicles used to spit into the air, writes Sheila Havman The cycle lane is bordered by a patchwork of plants. I can smell the Kentish Town

Kitchen from fifty yards – another benefit of ending motor traffic. The Blustons shop was the perfect place for it, with its big front windows allowing views of the

demonstration chefs. The real work, and fun, is in the kitchens in the back where Crossroads women are helping Year 7s from the Forest Secondary School make their own lunches. My job today is linking menu suggestions from Year 11s with vocational options such as measuring carbon footprints and sourcing menus from the local area. including from vertical farms.

# **NEWS IN BRIEF**

### Ubuntu Groups in Camden: I am Because You Are

NEXT week marks the ninth anniversary of the first Ubuntu mutual support groups, which have spread across Camden like a giant smile. 19 year old Camden resident Hareta Keita, who set up the first Ubuntu group explains: "After the pandemic was brought under control in spring 2021, the African philosophy of Ubuntu resonated with Camden residents. This led to the proliferation of Ubuntu groups right across the borough. Now in every ward, neighbours come together to help each other, to share skills and household items, to cook together, to care for each other, to shop and do chores.

The term from Africa in the 1850s stresses a universal bond of sharing and human connection.

### Goodbye GDP, hello Wellbeing Index

A TEENAGER in Camden has played a surprising role in pressuring the UN to adopt a global measurement of wealth that replaces Gross Domestic Product. GDP, which focuses on economic growth, will no longer be used as the only measure of a country's wealth. Kyle Lathpandura from William Ellis secondary school wrote to Director General of the UN, Li Jing Weh, to suggest a metric which will allow for a new, broader measurement to take into account things like good community, vitality, equality, psychological wellbeing and ecological diversity

## A great varn!

'THREADS,' a recycling facility that has been producing yarns made from old clothes is now setting up a new location in the west of Camden The circular model means that cotton clothing can be broken down and re-spun into usable fabric. This reduces the demand on the planet's resources for cotton which is a water and chemical intensive crop.

The second facility opening in March will create around 50 new jobs,

## **Open Camden New Year Fun**

NEW Year crowds enjoyed the bright winter sunshine on traf fic-free roads across Camden. Cargo bikes

transported a Brass to play in every ward. Kids brought their new bikes to the 'Crazy Cycle Track' on Finchlev Road, while the less athletic tried out a 'maxi-golf' circuit running through the Euston underpass. Organiser Efua Hopkinson said 'It was wonderful to see people catching with friends and family, and getting fresh air and exercise. It's hard to believe that a day that brings such pleasure was ever controversial'. Hopkinson was referring to the controversies that dogged the first three years of Open Camden, when opponents sought to mobilise the disabled and ill to oppose the scheme. However, it has been consistently shown that emergency response times are 26% lower on Open Camden days, due to the absence of other traffic.

ORGANIC WHOLFOODS
